**Configuration**

The package includes some software that needs to be installed on your server or workstation to upload the files that are being backed up. The client software requires that your firewall allows port 389 outbound. Please check one of the options below relating to your firewall.

**Firewall**

- I do not have a firewall  
 I have a firewall and can change the configuration myself  
 I have a firewall but need A2Z Computing to visit and configure it for me

**Client software**

- I can install and configure the client software myself  
 I need A2Z Computing to visit and install the software for me

Note: There will be an additional fee of £110+VAT if you require a visit for firewall configuration or client installation.

**Username and password**

In order for your account to be created you will need to provide a username to login. This will be used to connect to the server (either by SSH or FTP) to modify your site and its files. Please provide 3 choices, in order of preference, as we cannot guarantee that your first choice will be available.

1.
2.
3.

Once the account has been created we will generate a password and provide this separately.

**Security**Due to the nature of this service A2Z Computing will not store your password, or be able to find out what it is. Once your data has been encrypted with your password you must remember it or keep it written down in a safe place, as it will be required to restore any files. **Should you lose your password there is no way for us to access your data and it will be lost.**

I agree that I am responsible for the safety of my password and will not hold A2Z Computing responsible for any loss of data should I lose my password.
