

## Laptop Charging units

**A2Z Computing Ltd have been offering a wide range of IT services for over 24 years in South Wales and the West. We have clients from all across the UK, Europe and Worldwide.**

Manufactured in the UK from highest quality materials, the laptop charging solution is made to comply with EN60950:2000. The Fizzbook 32 is our biggest version has been designed as a compact, lightweight method of storing and charging up to 32 notebooks.

Ergonomically designed to include large rounded corners, a more aesthetically pleasing look for the classroom which also prevents damage to walls or doors caused by accidental collision.

The simple "in shelf" cable management system allows for cables and AC adaptors to be stored safely.

All shelves are designed with you in mind, with large spacing between each one for ease of access. They are also fully ventilated, which completely removes any potential for overheating problems that can be found with some lower quality products in today's marketplace.

Outlets are fitted inside the rear panel for secure access and connection with two meters of mains cable. Please note that a twin wall socket will be required for charging.

Available in 8,15,24,30,32 size units
