## Need to protected data offsite?

A4 A2Z Remote Backup - 2020-1

### Why Choose Hosted File Back-up?

Your most important business asset is your data as without your customer information; order details or product data you will not be able to perform any business activities. Imagine losing your business data, it could mean disaster. At the very least, it would damage your reputation.

Our File Back-up gives you the peace of mind that comes with the knowledge that your data is safely stored at all times.

### Guaranteed Data Protection

File Back-up uses high-end storage equipment, which is located in physically secured data-centres. Due to an extensive SLA you can always access your backed-up data. Your data is stored redundantly in two physically separate locations, to ensure the availability of the data. The data-centres has multiple standardization certifications.

### How does File Back-up Work?

File Back-up offers a cover-all, end-to-end solution for your backup issues. The solution creates a back-up of the data on all of your computers, irrespective of your location. The solution operates in a fully automated way, offering unrivalled ease-of-management and supports various operating systems.

### Optimal Security

Powerful encryption, Secure Sockets Layer (SSL) and SOAP message signing; these are just a few of the security technologies that ensure your data is protected with our File Back-up. For instance, 256-bit AES encryption guarantees that any data you send via the Internet is always optimally encrypted.

- Windows, Mac & Linux support
- MS Exchange server backup
- MS SQL server backup
- MySQL database backup
- Open file backup
- 256-bit AES encryption
- Seed-load technology
- Pre & post scripts
- Web access to backed up files

### External Data Centres

With our File Back-up, your data is sent directly to a secure external location in uk. This eliminates dangers like theft and fire, which do affect local (tape, disk) back-ups.

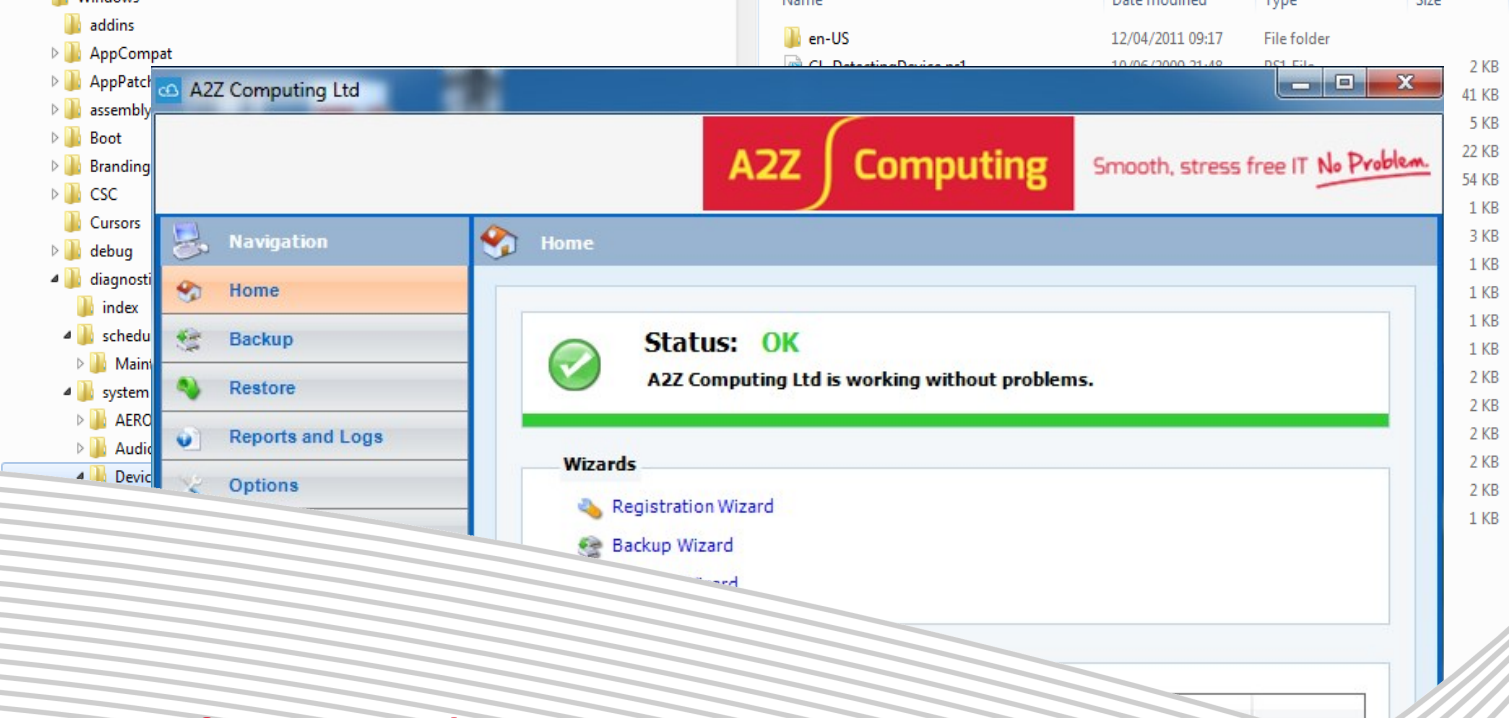

### The below storage packages are:

- 25GB workstation account
- 100GB workstation account
- 250GB workstation account
- 150GB server account
- 500GB server account
- 2TB server account
- 5TB server account

**A2Z Computing**

Smooth, stress free IT No Problem.

## Benefits to your business

### Automatic

Backups are made automatically through a schedule. Therefore human intervention is not necessary.

### Peace of Mind

File Back-up, is 'fire and forget' software; once configured, it works fully automatically and you will receive emails with status updates.

### High Availability

With File Back-up your data is continuously and directly available. When you lose data, you can immediately start with restoring your data.

### Low Cost of Ownership

File Back-up needs to be configured once; thereafter all backups are executed automatically, saving you time and money!

### Easily Restored

The restore of your data is very fast and easy. You select the backed-up data and choose the target location. In no-time your files and folders are back on your computer.

### Versions

File Back-up can keep a history of your file changes depending on your retention preferences. Changed files are stored as a new version, which allows you to go back weeks to restore the desired version.

## Hosted Acronis Backup Cloud

Ensure that your data is kept safe with our UK based cloud data backup service

Smooth, stress free IT No Problem.
