

Hosting Services

A2Z Computing's dedicated and shared managed hosting solutions provides a flexible hosting and mail management system.

Both services are fully managed, monitored and maintained by our experienced UK based technical support team. Our system allows domains and e-mail accounts to be created and managed as well as providing detailed web, mail and FTP statistics on a global or per domain basis including live logs and service status.

Servers are deemed expensive and can be time-consuming to manage. Let A2Z Computing manage and monitor your hosting.

Features:

- Up to 10Gbps capacity
- Connection to 38 MOKS nodes throughout the UK
- Cisco equipment at all nodes
- Multiple Tier 1 carriers & 900 peering sessions
- Easily scalable
- Flexible
- 24/7 Monitoring
- 24/7 UK helpdesk support
- IPv6 compatibility
- Guaranteed up-time within 2 hours if the 'worst case scenario' occurs

Our promise:

"We **will not** sell you something you do not need."

"We have been using A2Z Computing for many years now and find their level of care and support second to none. We would highly recommend A2Z Computing not only for the exceptional service but for their value, a great job for great price, - well done."

Judith Evans
Director, GroundWorks

Hosting Services

Features	Benefits
Easy online management via a secure portal	Manage your customers' web hosting, email, database and DNS services online with stats, logs and webmail.
White label options	The end user and webmail portals can be branded with your own company logo and colour scheme enabling you to sell the services as your own.
State of the art data centres	Complete confidence with rigorous security - including 24/7 guard patrols, a controlled access system and extensive CCTV monitoring, air conditioning
High quality specification	Each server is fitted with a multi core Intel CPU, a minimum of 2GB RAM and a large capacity hard drive.
Fully managed service	All maintenance is conducted by server team, including daily backups.
24/7 monitoring & 24/7 helpdesk	Continuously monitored and supported to ensure consistency of service and immediate action where necessary

Dedicated Hosting

For those requiring a dedicated server hosted in a secure data centre environment, we supply and maintain Viper, a dedicated server on which you can host or backup your data. Our customers are able to maintain complete control over all aspects of the server. All the systems are fully managed from administration including FTP, email accounts, aliases and DNS Configuration giving you a complete piece of mind.

Shared Hosting

For those requiring basic hosting in a secure and controlled environment, our shared hosting solution, Viper Lite, provides all the functionality of our dedicated hosting solution, Viper, but on a smaller scale. Viper Lite provides up to 30 domains, 10 mailboxes per domain, 10 MySQL databases, 1 IP address, 1 SSL certificate and up to 80GB of storage. We provide access to a proportion of a server shared with other customers. And its all fully managed you never need to worry.

Why Hosting

While our fully managed hosting solutions are ideal for end users looking for an easy -to-use and secure service, they can also be purchased by ISPs and Web Designers as a value-add to their existing connectivity services. Therefore, ISPs can either deliver the web and mail hosting services as an additional feature of their existing services or supply them as a standalone product under their own company branding.

Smooth, stress free IT No Problem.
